Service Plan Benefits

Fixed monthly price

Fixed monthly price. All future costs are calculated at today's prices, meaning your future car servicing will be free of inflation for the period of the plan.

Small Monthly Payments

Small monthly payments. Making these small regular monthly payments makes budgeting for your annual service easier.

Easy Plan Transfer

Any car goes. If you change your car, any money in the service plan fund, minus the cost of any work carried out, will be transferred to your new vehicle. Minus monthly management fee.

Easy cancellation

The service plan can be cancelled at any time and a refund given, minus the cost of any work carried out and monthly management fee.

Service history maintained

The plan is for all servicing in accordance to manufacturer's schedules. Having a dealer service history helps maintain the value of your car, plus:

- The benefits of dealing with a reputable Dealer.
- Manufacturer trained technicians Potential goodwill and contribution from Manufacturers
- All work guaranteed - parts and labour

Service Requirements

No one knows your car better than we do. This guide will help you understand the work that's done when your car is serviced or maintained. We promise that our Bosch or Vauxhall experts receive the latest training, and have instant access to the latest tooling and technology. We love your car as much as you do.

Servicing from only £23 per month

Service Type	Time & Distance	
Oil & Filter Change	Every 6 months	Lubricates the key components and helps maintain the vehicles performance
Interim Service & Check	Every 12 months or 10,000 miles	Essential annual maintenance for your car, to keep it running well.
Main Service & Check	Every 24 months or 20,000 miles	A more detailed check and inspection, including the replacement of the cabin filter, fuel filter (Diesel) and Key Fob battery
Major Service & Check	Every 48 months or 40,000 miles	An extensive and thorough maintenance for your vehicle, including the replacement of the air filter, fuel filter.

MOT Test

Why do I need an MOT?

It's the law. The Ministry of Transport requires all vehicles to meet a minimum standard.

How often do I need an MOT?

Once a vehicle reaches 3 years old, it will require an MOT each year.

What happens if I don't have an MOT?

It's illegal to drive a vehicle without a valid MOT certificate. You can be fined and get points on your licence. If you had an accident your insurance could be invalid.

Air-con Service From £3.44 per month

Why does it need to be serviced?

Over time the Air-Conditioning system will lose some of its gas and unless it's replaced your system will become less able to keep you cool and refreshed.

How often should it be serviced?

An Air-Conditioning system can lose up to 10% of its gas each year, so a service every 2 years is recommended. **Every 12 months** you should have a refresh to keep bacteria and nasty odours at bay.

What happens if the air-con is not serviced?

What happens if it's not serviced? The system would continue to lose gas, resulting in the system becoming less efficient, leading to increased fuel consumption. The system would eventually fail leading to replacement parts being required.

Brake Fluid Change from £3.05 per month

Why does it need to be changed?

Brake fluid must withstand operating temperatures of up to 230°C but over time absorbs water which boils at 100°C. As the water boils, it turns to compressible vapor which means you won't be able to brake as efficiently

How often should it be changed?

Because it absorbs moisture over time, brake fluid must be replaced at **year 2 and every 2 years** after that, irrespective of the mileage

What happens if the Brake Fluid is not changed?

If too much moisture builds up, the brake fluid can boil while the brakes are being used. This seriously affects braking performance and can cause the braking system to fail. A spongy feel to the brake pedal shows this has started to happen.

Cambelt & Water pump *From £22.05 per month*

Why do they need to be changed?

The cambelt is one of the hardest working components in your engine. It's a rubber-toothed belt that drives major parts of the engine and keeps everything synchronized. Changing it prevents snaps, cracks and tears which in turn minimizes the risk of major engine damage. Whilst the cambelt has been removed, we would also recommend changing the water pump at the same time, for additional cost savings.

How often should it be changed?

Your cambelt needs changing when it reaches the age or mileage limit recommended by the manufacturer. Please call us for more information.

What happens if it's not replaced?

The belt can go slack, causing it to snap or jump, this can cause severe damage inside the engine. The vehicle will break down and it could cost you several thousand pounds to repair

Wiper blades *Change from £3.05 per month*

Why do they need to be changed?

You should replace your wiper blades to ensure maximum visibility and to avoid damaging your windshield:

How often should they be changed?

You should replace your windscreen wipers every 12 months, but you may need to replace them sooner depending on your climate and usage:

What happens if the wiper blades are not changed?

If you don't replace your wiper blades on a regular interval, you will experience decreased visibility, as well as risking damage to the windscreen

Did you know we also offer....

- Vauxhall & BOSCH all makes servicing & repairs
- Fixed price promise
- Online check-in
- Competitively priced tyres
- 0% Payment plans available on repairs
